About me

Experienced JavaScript engineer proficient in Angular, React, Node.js, and modern web technologies. Committed to delivering efficient, scalable solutions for dynamic web applications.

Laboral experience

Mar 2022
Currently

Tata Consultancy Services 2Y
Sr Javascript Engineer (Angular | React)

Working on creating, executing and programming complex requirements for a world-wide e-commerce application using technologies as Javascript, MV-VM/MVC frameworks including Angular and React, unit testing using Jest, Karma and Jasmine, API Restful, consuming some azure services like Azure Keyvault, Azure Blob Storage, Twilio, SendGrid, JWTToken and Auth0 authentications, SAFe Methodology, Azure Devops, Git, CSS3.

Result being obtained

1. Implement new functionalities for sections of applications worldwide, configurable by countries.
2. Code Migration logic to new Client applications, with the best robust and updated architectures.
3. Unit testing for applications built in javascript, Angular and React applications to standardize the application quality.

Jan 2021
Feb 2022

DXC Technology 1.5Y
Angular Developer

Build new applications and modern software architectures using Javascript, Angular, Nodejs, Unit testing using Karma and Jasmine, CosmosDb, Scrum methodology, git, for a private hospital (Alignment HealthCare based in CA, NV, TX, FL, NC and AZ) including specific functionalities:

1. Follow-up of patient treatment (appointments, treatment, medication doses).
2. Emergency service for patients (emergency calls, home care, assistance button, etc).

Result being obtained

1. Create new features for patient monitoring.
2. Support Adding new open states for sell assurances (For Legacy Application) and support production issues.
3. Provide new reusable components for others team members(Already in production).
